

Compatibility Quick Reference

Every SKU listed below is **FDA 510(k)-cleared** • ISO 13485:2016 • EU-MDR. A SEVA SKU exists only where the kit is cleared.

SEVA Devices™ supplies OEM-grade contrast-injector disposables for current- and prior-generation syringe-based power injectors across the major OEM platforms it supports: Bayer, Bracco, Guerbet, and Nemoto. Find your platform by modality below; each row is a stocked, cleared kit with its OEM cross-reference. One coming-soon platform — Bayer's Mark 7 Arterion (angiography) — is flagged separately.

CT — POWER-INJECTOR KITS

INJECTOR PLATFORM	SEVA SKU	OEM CROSS-REF	CONFIGURATION
MEDRAD® Stellant Stellant Classic • dual head	HS-DCD201	SDS-CTP-SCS / -SPK / -QFT	2 × 200 mL syringes • 60" T coiled dual-check tubing • 2 large spikes • prime tube • 20 kits/box

Coiled tubing, 60" (1500 mm), DEHP-free	HT-L1500CF	Universal	Single line · 100 ea/box
Y coiled tubing, 60" (1500 mm), dual check, DEHP-free	HT-LY1502CF	Universal	Dual-check Y line · 100 ea/box

- **Built to OEM dimensional and pressure specifications.** 510(k) summaries and OEM reference numbers are available on request.
- **Supply independent of OEM lifecycle.** SEVA supplies disposables for the installed platforms it supports and continues to supply them independent of any OEM's service or product-lifecycle decisions.
- **Request an evaluation (VAC) kit.** Submit the platforms you run at sevadevices.com/request-information and the SEVA team returns the matched kits and documentation for committee review.
